

# INTRODUCING

the industry's most advanced channel letter bending machine – the Accu-Bend Stingray.

# KEY FEATURES

Over 30 years ago, Computerized Cutters revolutionized the sign industry with the world's first automatic channel letter bending machine. Now, we're doing it again.

Built on decades of innovation, the Accu-Bend Stingray combines our market-leading technology with a sleek new design — all engineered, built, and manufactured right here in the USA.

MADE IN AMERICA

**NEW**

#### Expandable Offload Table

- Allows for the majority of letters up to 3 ft high to be run unmanned so that your team can accomplish more work elsewhere in a given day

**NEW**

#### Automated Coil Lift System

- Now you can easily replace and lift heavy coils without breaking a sweat - or your back

**NEW**

#### Dual Bend Arm System for Sharper and Smaller Bends

- Now you can make back-to-back crisp bends as small as 3/8<sup>th</sup> of an inch

**NEW**

#### Zero Waste Cutter

- Material can now be cut precisely where you want at the end of each letter eliminating any secondary work or scrap material

Bends .063 coil from 1 in up to 8 in

#### Improved Notching

- For tighter and smoother Bends

#### Improved Flanging

- For the sharpest 90 degree bends

Improved High-Speed Carbide Bit Scriber
